PROFESSIONAL SUMMARY

Honors Computer Science student, experienced in developing full-stack web applications, machine learning models, and large-scale Java software, with a proven record of delivering award-winning projects and applications used by 120K+ users.

EDUCATION

University of Delaware

Bachelor of Science in Honors Computer Science, Cybersecurity focus
Minoring in Mathematics and Data Science, Cybersecurity, and Statistics
GPA: 3.8

Aug. 2024 – May 2028
Newark, DE

EXPERIENCES

VP of Academic Excellence

Delta Upsilon, Delaware Chapter

Feb. 2025 – Feb. 2026
Newark, DE

- Led academic initiatives including a peer study program, structured study hours, and exam preparation strategy meeting which resulted in a ~4.9% increase in cumulative GPA (2.884 → 3.024) and a ~29% increase in Dean's List recipients within one semester.
- Redesigned Microsoft Excel and Word workflows to streamline academic tracking, data collection, reporting, and record management, creating a sustainable system for future executive board members.

PROJECTS

UD Dataquest Winner | Python, Data Analysis, Machine Learning, Pandas, NumPy, Seaborn

May 8-10, 2026

- Analysed Delaware's Department of Education dataset to identify factors contributing to above-average teacher turnover across school districts.
- Developed a predictive machine learning model ($R^2 = 0.919$) that identified average salary (50%), district transfer rate (30%), and teacher experience (18%) as the primary drivers of turnover.
- Built a data-driven salary investment model estimating that a \$1,515 per-teacher investment could reduce statewide turnover by approximately 1 percentage point, supporting evidence-based policy recommendations.

Drafter Website Builder | React, TypeScript, Dexie.js, Jest, Cypress, SCRUM, Agile

Apr. 2026 – Jul. 2026

- Features page routing, live code generation, project import/export, and project graphs
- Collaborated in a 3-member Scrum team over 3 Agile sprints, using version control, participating in sprint planning sessions and commit code reviews, while also integrating feedback to deliver project milestones on schedule.
- Presented project demonstrations to an audience of 30+ classmates and instructors every two weeks, effectively communicating technical progress, design decisions, while responding to questions and incorporating stakeholder feedback.

Superhero Mod | Java, Gradle, Large Repo Migration, Modding

Jul. 2019 – Present

- Developed a mod that expands upon the popular video game Minecraft, adding new content to the game for members of the Minecraft modding community.
- Published mod to websites gaining over 120K+ downloads, and a large discord community.
- Incorporated community feedback to prioritize features and resolving issues for the player base.

TECHNICAL SKILLS

Languages | Python, JavaScript, Typescript, Java, C/C++, C#, HTML, CSS, Kotlin, Bash, SQL

Frameworks | React, Django, Flask, Node.js, Express.js

Developer Tools | Git, Docker, Visual Studio Code, JetBrains IDEs, Microsoft Office, ESLint, JIRA, SCRUM

Libraries | React Router, Zod, Lucid React, React Icons, Motion, Pandas, Numpy, Socket.io
